MANHATTAN

BETON EFFECT

Create a sophisticated and contemporary atmosphere with **MANHATTAN**, thin cover material which gives to your walls the silky aspect of a matt or polished beton : rough, shod, studded, structured, brushed shod...

Pour cette réalisation le béton a été recouvert par une résine adaptée.

🔧 PREPARATION :

Walls have to be clean, healthy, dry, non greasy, cohesive, devoid of any crisp parts. They have to follow DTU 59.1 recommendation. In case of plates of plaster or fillers plaster or plaster and lime, apply beforehand a coat of 740 Imprim.

🥄 MIXING AND PIGMENTATION :

Mix beforehand the necessary pigments with a part of **MANHATTAN** binder, until obtaining homogeneous mixture. Then mix **MANHATTAN** powder with binder until obtaining homogeneous dough. The time of use is approximately 2 hours in 20°C.

🔨 IMPLEMENTATION :

Apply **MANHATTAN** with the help of a lisseuse in two or three coats according to the expected results. Protect it by applying a finishing wax. Cleaning of tools in the water.

🎨 LES EFFETS :

Rough : apply a first coat of 1 mm in thickness, shod when the product begin to dry, add a second coat by structuring the aspect, shod again from the beginning of the drying.

Shod : apply a first coat of 0.5 mm in thickness with the help of the lisseuse, shod and add a second coat by slicking the material, shod again from the beginning of the drying.

Studded : apply just one coat of 2 mm in thickness, cross the roller with teeth, and pass with the spatula by touching lightly the material.

Structured : apply just one coat of 2 mm of thickness, and pass spatula by printing material from top to bottom.

Brushed shod : apply a first coat of 1 mm of thickness with the help of the lisseuse, and use the brush to structure the material. After complete drying, shod and apply again a second fine coat with the help of the lisseuse to fill streaks and shod from the beginning of the drying.
