In spite of the care we took of this document, we can not guarantee to match the real tone.

PREPARATION :

Walls have to be clean, healthy, dry, non greasy, cohesive, devoid of any crisp parts. They have to follow DTU 59.1 recommendation. In case of plates of plaster or fillers plaster or plaster and lime, apply beforehand a coat of 740 Imprim.

MIXING AND PIGMENTATION :

Mix preferably mechanically 1 bucket of 10kg of **VENEZIA** for 6 to 7 liters of water until obtaining a homogeneous mixture. Beforehand, pigments need to be diluted in a part of the water used for the mixture.

THE IMPLEMENTATION :

Apply in several coats as thin as possible (<1mm), by leaving the tracks of impact of the stucco's spatula. Work fresh on fresh supports, coats by coats by avoiding modifications. Shod the different coats step by step, with the help of stucco's spatula. Cleaning of tools in the water.

Can be keep several days after mixture in a well closed bucket.
